SANA is a visual identity project for an educational platform that targets children between the ages of 5 and 16. The platform focuses on teaching the fundamentals of programming and design through simplified, interactive, and enjoyable learning experiences that nurture creativity and problem-solving skills.

The concept behind the visual identity is inspired by **light as a symbol of knowledge, exploration, and discovery**. This idea reflects the platform's mission to spark curiosity in young learners and guide them toward understanding technology as a creative and empowering tool. The design approach combines modern digital aesthetics with a friendly and engaging visual language suitable for children, while maintaining a strong connection to the **Arabic cultural and linguistic context**.

Through its visual identity, SANA represents a space where education, creativity, and technology come together to support the next generation of innovators.
